

Online Bookstore Website

1. Example Bookstore Websites

Amazon Books: <https://www.amazon.in/books-used-books-textbooks/b/?node=976389031>

Flipkart Books: <https://www.flipkart.com/books>

BooksWagon: <https://www.bookswagon.com/>

PustakMandi: <https://www.pustakmandi.com/>

Kitabain: <https://www.kitabain.com/>

2. What Frontend (User Side) Needs

- Show book list: image, name, MRP, discounted price
- Search and filter (author, price, language)
- Book details page: description, add to cart
- Cart page: books, quantity, total price
- Checkout form: name, phone, email, address
- Add coupon code (discounts or offers)
- Payment integration (Razorpay, Shiprocket, etc.)
- Order confirmation + tracking link

3. What Backend (Server Side) Needs

- Book database: title, price, stock, image
- User system: login, addresses
- Order system: save order, payment status
- Shiprocket API: create order, tracking
- Payment API: Razorpay or PayU
- Send order and tracking email/SMS (optional)

4. How It Works (Step-by-Step)

1. User browses and adds book to cart
2. User enters details and applies coupon (if any)
3. User pays via payment gateway
4. Backend creates order and calls Shiprocket API
5. Payment success → generate shipping and tracking
6. User sees order confirmation and tracking

5. Helpful Links

Shiprocket API: <https://apidocs.shiprocket.in>
